

Donor #1522 - Pen Sketch and Goodwill Message

Pen Sketch

I will start by saying my childhood was great. My parents did the best they could have done bringing up me, my brother and sister. I was lucky really and still am to have the family I have. Also, a lot of family and friends was a great support that helped mould me into the person I am today. I'm easy going honest and maybe sometimes I'm to laid back for my own good but that hasn't always proved a negative. I have been in a relationship with my partner for 17 years which has been a massive stability in my life. She is my best friend. I do make friends easily and that has always been an asset at various times. I still know a lot of friends I grew up with too that has been valuable to me. I have been a Baker going on 20 years. Sometimes I honestly don't know why or how I started out as a caterer, but never set out to be one. I have a keen interest in history and Sci-Fi and a mind for information retention. Some say I should be a teacher. I'm a massive football fan and following my club has been a big part of my life, I did enjoy playing as a child too. I regret not keeping it up. I've travelled a lot in my life and it's definitely broadened my horizons and made me see the scale and beauty and also the hardship of this rock we all call home.

Good Will Message for Recipients:

I started this process so that I could help people such as yourselves to obviously conceive a child after having seen what joy and love children bring to their parents. I decided it was something that, if able, I would do. I'm pleased you are considering that I could well be the donor for you. At the time of writing this I have no children of my own but recent decisions and event could mean that's about to change in the near future. I wish you all the best with your future prosperity too. I hope it brings you all the success you started out to achieve. I've learnt from this donation program what a lengthy process IVF and such treatment can be so good luck!

Goodwill Message for Children:

So I'm sure your parents told you, you were donor conceived when they deemed you older enough to understand what that meant. I was just a small part in the process of bringing you into this world. It's parents that went through a longer journey. As I'm writing this, I'm trying to think of something profound or insightful to say to you; but now I'm here, I'm stumped really. I will say to you though, never take your parents for granted. Family should always be the most important thing in your life. I hope so far life has been kind to you and will continue to prosper going forward to whatever you decide your future to be. Just remember to have fun along the way and make those good memories count. I myself have travelled a lot and you might do the same and I advise you to see as much of the world as you can and if you choose to, it will help broaden your horizons for sure. Take care. All the best and if you can't be good be lucky.
