I am a child for a poor working people family. Both of my parents were refugees and i grow up in a refugees area. I had a beatiful childhood full or sun, outside games and a lot of social life
As a teenager I started searching about ideology. My family was always place on the hard left. I was active in politics from a very early age, in high school and even more in uni.
Through my teenage years a tried to work on summers or holidays, either with my father as a house decorator, either in similar diy jobs. I was always facinated on wood.
At the uni I finalise that my life's goal was to be as good as I could based on my ideology. I am a marxist Leninist - What you might know as communist. My work is related with that. Even my donation it is.
I am fighting for a better sociaty, a society with no explotation human from human, a society were goods as health, house, education, work, culture are fundamentaly free. Fair opportunities to everyone. FAIR- not equal.
There comes my donation. My some stone to support people or couples to have children.
Closing I want to make clear to you that you already know your family. I am nothing to you more that someone that help your parents on the process to have a child, as a doctor or a nurse.
I wish to you the best
