Donor Extended Profile

Donor Attributes

Your Origins: -

Town/State/County of Birth:

Country of Birth:

Race: - *Ethnicity:* Caucasian

If mixed or other, please specify:

Asian Indian (please specify region/community you belong to):

Your Nationality:

Personal Characteristics: -

Eye Colour: (Please click to select; you may mark more than one colour as appropriate)

Blue Green Brown Grey Hazel Other:

Natural Hair Colour: (Please click to select as appropriate)

Black Dark Brown Light Brown Light Blond Dark Blond Red

Other:

Your hair colour as a child

Hair type: (Please click to select; you may mark more than one type as appropriate)

Straight Wavy Curly Afro

Balding (Age of onset):

Receding (Age of onset):

Hair Texture: (Please click to mark as appropriate):

Normal Frizzy Thin Coarse Smooth Silky

Donor #1451

Document number:	LO-FRM-344	Author:	Minbattiwalla, Meheranghiz	Review date:	13/07/2019
------------------	------------	---------	----------------------------	--------------	------------

Skin Tone: (Please click to mark as appropriate)

- Very Fair Light Brown Olive
 Fair Medium Brown Medium Black
 Medium Fair Dark Brown Dark
 Black

Do you have freckles? No

If yes, how many freckles do you have on unexposed areas of your skin? (Please click to mark as appropriate)

- Many Several A Few Very Few None

How does your skin respond to the sun? (Please click each column to mark as appropriate)

- Always tans deeply Always burns, blisters and peels
 Tans moderately Often burns, blisters and peels
 Tans lightly Burns moderately
 Not at all or tans very lightly Burns rarely, if at all
 My skin is naturally dark

Current Height (m):

1.93

Current Weight (kg):

100

Body type: (Please click to mark as appropriate)

- Athletic Large Muscular Slim

Eye Sight:

- Normal Sighted Long Sighted Short Sighted

I wear corrective glasses/lenses: Yes

My sight is surgically corrected: No

Donor #1451

Mention any distinguishing features you have: (e.g. cleft chin, dimples, hooked nose, roman nose, etc.)

None

Education:

What is your basic qualification?

A Levels

What is your highest qualification?

MRes

Mention any additional qualifications you have:

Nothing mentioned

What is your current occupation?

Process Chemist

Mention other occupations you have had in the last 5 years:

Nothing mentioned

Where do you see yourself in 10 years' time?

Chemical Engineer

Are you?

Religious Agnostic Non Religious Atheist

If religious, what religion/belief do you follow?

A bit more information...**What is your:**

Mother tongue:

English

Do you know any other languages?

French

Favourite Food(s):

Steak

Favourite sport(s):

Rugby & weightlifting

Favourite TV show(s):

None

Favourite Film(s):

Generation War, Rock'n'Rolla, Snatch

Favourite Music:

Jazz

Favourite Colour:

Black

Favourite animal(s):

Cat

Do you have any pets? Yes

If yes, which pets do you have?

One cat

Favourite Holiday Destination(s):

Hawaii

Favourite Cities:

London

How creative are you?

Creative enough to have some problem solving skills

Do you have tattoos? Yes

If yes, mention where and since when

[REDACTED]

Do you have any body piercings? No

If yes, mention where and since when?

Are you?

 Right Handed Left Handed Ambidextrous

What are your Interests & Hobbies

Sports & mindfulness

How are your Athletic skills?

Good due to weightlifting

Donor #1451

How are your Mechanical skills?

Good

What motivates you?

The drive to build or achieve a goal

What are your strengths and weaknesses?

Strength: Reliable Weakness: Stubborn

How is your relationship with your family?

Good

Describe yourself in 5 words:

Hard worker - Leader - Critical thinker - Health conscious - Strong

What kind of a person are you? *(Please select one of the two options for each attribute)*

Rate your intelligence from Howard Gardner's Multiple Intelligence Assessment: - mark 1 as most and 9 as least of your intelligence (*follow guidance notes below*):

Intelligence Category	Score (1-most, 9-least)
Naturalist (Understanding living things and reading nature)	7
Musical (Discerning sounds, their pitch, tone, rhythm, and timbre)	3
Logical-Mathematical (Quantifying things, making hypotheses and proving them)	1
Existential (Tackling the questions, of why we live, and why we die)	2
Interpersonal (Sensing people's feelings and motives)	8
Bodily-Kinaesthetic (Coordinating your mind and your body)	9
Linguistic (Finding the right words to express what you mean)	4
Intra-Personal (Understanding yourself, what you feel and what you want)	5
Spatial (Visualizing the world in 3D)	6

Naturalist Intelligence: Naturalist intelligence designates the human ability to discriminate among living things (plants, animals) as well as sensitivity to other features of the natural world (clouds, rock configurations). This ability was clearly of value in our evolutionary past as hunters, gatherers, and farmers; it continues to be central in such roles as botanist or chef. It is also speculated that much of our consumer society exploits the naturalist intelligences, which can be mobilized in the discrimination among cars, sneakers, kinds of makeup, and the like.

Musical Intelligence: Musical intelligence is the capacity to discern pitch, rhythm, timbre, and tone. This intelligence enables us to recognize, create, reproduce, and reflect on music, as demonstrated by composers, conductors, musicians, vocalist, and sensitive listeners. Interestingly, there is often an affective connection between music and the emotions; and mathematical and musical intelligences may share common thinking processes.

Logical-Mathematical Intelligence: Logical-mathematical intelligence is the ability to calculate, quantify, consider propositions and hypotheses, and carry out complete mathematical operations. It enables us to perceive relationships and connections and to use abstract, symbolic thought; sequential reasoning skills; and inductive and deductive thinking patterns.

Existential Intelligence: Sensitivity and capacity to tackle deep questions about human existence, such as the meaning of life, why we die, and how did we get here.

Interpersonal Intelligence: Interpersonal intelligence is the ability to understand and interact effectively with others. It involves effective verbal and nonverbal communication, the ability to note distinctions among others, sensitivity to the moods and temperaments of others, and the ability to entertain multiple perspectives. Teachers, social workers, actors, and politicians all exhibit interpersonal intelligence. Young adults with this kind of intelligence are leaders among their peers, are good at communicating, and seem to understand others' feelings and motives.

Bodily-Kinaesthetic Intelligence: Bodily kinaesthetic intelligence is the capacity to manipulate objects and use a variety of physical skills. This intelligence also involves a sense of timing and the perfection of skills through mind-body union. Athletes, dancers, surgeons, and crafts people exhibit well-developed bodily kinaesthetic intelligence.

Linguistic Intelligence: Linguistic intelligence is the ability to think in words and to use language to express and appreciate complex meanings. Linguistic intelligence allows us to understand the order and meaning of words and to apply meta-linguistic skills to reflect on our use of language. Linguistic intelligence is the most widely shared human competence and is evident in poets, novelists, journalists, and effective public speakers. Young adults with this kind of intelligence enjoy writing, reading, telling stories or doing crossword puzzles.

Intra-personal Intelligence: Intra-personal intelligence is the capacity to understand oneself and one's thoughts and feelings, and to use such knowledge in planning and derationing one's life. Intra-personal intelligence involves not only an appreciation of the self, but also of the human condition. It is evident in psychologist, spiritual leaders, and philosophers. These young adults may be shy. They are very aware of their own feelings and are self-motivated.

Spatial Intelligence: Spatial intelligence is the ability to think in three dimensions. Core capacities include mental imagery, spatial reasoning, image manipulation, graphic and artistic skills, and an active imagination. Sailors, pilots, sculptors, painters, and architects all exhibit spatial intelligence. Young adults with this kind of intelligence may be fascinated with mazes or jigsaw puzzles, or spend free time drawing or daydreaming.

Pen Sketch *(Please write an essay about yourself i.e., describing your childhood, progressing towards your adult life in a few words, including some memorable events if you've had):*

My life started in the outskirts of Paris in a loving family composed of my mum, my dad and my two sisters. I was naturally introvert and good at school during my childhood overall. I was fond of science and engineering already. Then I started growing up and took part into a wide range of sports I did not like eventually – swimming, archery, table tennis, judo etc. I was trying to find the right one. Rugby was the one and I practiced it during 10 years at national level. I started studying economics and maths for my GCSE. After this I followed my dream to start my medicine studies. I failed the exams and decided to study chemistry. After finishing my master's degree in UK, I had a studentship to do a PhD. Along my personal life I found out that I become more sensitive as I aged. Also, that attitude is a critical factor in the way we approach life. Some steps might be hard at first sight, but I always used to think of them as a stepping stone for later. Now, writing up my PhD thesis and working full time is a challenge but I am blessed with having a partner supporting me toward this goal. I have been through some tough times in my relationship and falling in love was certainly the best moment of my life.

Goodwill Message for recipients using your donations:

I am glad I was able to help you. I wish you all the best for you and the family you created. I am sure you have a create a loving family through my donations and I wish you all the best.

Goodwill Message for children born from your donations:

I hope this letter will find you in 18 years time.

I wanted to tell you that I am glad I helped your family to have a child they dearly wanted. I hope you have received all the love you needed so far. Your parents were brave to go through this procedure and I am sure you enjoy all the moment in life you share with them.

I wish your life will be filled with happiness and love from your family you have and you will create.
